Analog Missionary has developed a vast, multi-layered sound that sweeps from grandiose movements of intense power to calmer moments of emotive introspection. Their sound has been characterized as sultry, acoustically complex, sonically textured, and eclectic. The band's strength is their ability to balance the fragile with the ferocious... Anstrom's singing has been described as a layer of voices, a vocal multiplicity that lifts and swoons, excites and calms; vocal variations that are both hauntingly beautiful and deliciously exciting. Currently they are touring the US and completing their 3rd album.
